Oh yes – that one presentation we gave to the partner agencies?

I remember NJDEP and NOAA very sincerely telling us how good of a presentation that one was. I think that was before the conditional simulations were fined tuned.

I think we may already have this from one of John's presentations regarding the choosing of interpolation methods.

I was planning on spending some time on the presentation today/tomorrow let me see what I can find to fill this in.

That is probably more than a couple of slides. Karl indicated that CSTAG typically wants to hear what interpolation methods we evaluated. So, I'll let you guys figure out how best to relay that information without going down a rabbit hole.

We will be reworking the first day to have the site tour in the morning so we can have more time for our presentation in the afternoon. That extra time should be to spend more time on interpolation methods and the 11 principles memo. I'm still looking to keep the CSM and both risk assessment discussions succinct.

One more item, I just heard from Jen. Can you please add a slide about the following to the CSTAG presentation: "the interpolation methods and how we got to CS 37 map"?

Thanks
